IOS DEVELOPER

A pragmatic iOS professional with a Bachelor's in Computer Science, Certifications and 7+ years of experience in designing, developing, and deploying scalable mobile applications using Swift, SwiftUI, UIKit, Combine, WebRTC, Firebase, MVVM and VIPER architecture. Proven expertise in FinTech, real-time communication, payment systems, KYC/AML workflows, REST APIs, Firebase, Sockets, CI/CD, and App Store deployment.

Professional Experience

SR. IOS DEVELOPER **May 2025 - August 2026**

BARQ PK Pvt. Limited: Working on secure, scalable mobile banking and digital payment solutions, focusing on iOS application development, performance optimization, and seamless user experience. Collaborating closely with backend, product, and compliance teams to deliver reliable FinTech products aligned with regulatory standards.

Improvements and key responsibilities

- Built and optimized **secure payment** and transaction flows, increasing user engagement by 25% while maintaining PCI-DSS compliance.
- Managed user states and streamlined **KYC** verification, reducing customer onboarding time by 30%.
- Implemented real-time data synchronization with secure cloud services, ensuring accurate transaction states and AML-ready activity tracking.
- Integrated **NADRA APIs** for secure face detection and fingerprint verification, enhancing KYC and identity authentication processes.
- Integrated Saudi Arabia's **Nafath** digital identity platform, enabling secure authentication, regulatory-compliant user onboarding, and enhanced fraud prevention mechanisms.
- Implemented socket-based data management for real-time, secure, and reliable transaction updates.
- Collaborated with backend, compliance, risk, and QA teams to deliver features aligned with banking regulations and security best practices.
- Implemented **State Bank SOPs** to ensure compliance with regulatory standards and secure financial operations.
- Monitored app analytics, crash reports, and QA feedback, driving continuous improvements to enhance user experience and reliability.
- Optimized CI/CD pipelines, automated testing, and App Store releases, improving deployment efficiency and regulatory review timelines by 30%.
- Built and maintained reusable, consistent UI components to ensure smooth and secure user interactions across wallet screens.

Mobile Application:

Barq PK: Pay and transfer faster than ever, safely in your pocket

SR. IOS DEVELOPER **June 2022 - Feb 2025**

Afiniti Software Solutions (Team Confu): Worked on the development of Confu, a comprehensive enterprise-grade VoIP conferencing platform at Afiniti Software Solutions, contributing to its core architecture, real-time communication features, and product enhancements leading up to its successful launch. The platform was later rebranded as **Speeqr**, a cutting-edge communication solution enabling seamless real-time voice, video, and messaging experiences through advanced WebRTC technology, AI-powered noise cancellation, and echo-free audio processing. Contributed to building scalable, high-performance communication features that enhanced collaboration and user engagement across the platform.

Improvements and key responsibilities

- Expertly implemented the **VIPER** architecture, promoting separation of concerns and facilitating efficient collaboration between UI, data, and business logic layers to improve performance by 40%.
- Implemented **QR code-based** meeting join functionality, reducing user onboarding time.
- Developed high-quality UIs **programmatically in UIKit without storyboard**, utilizing advanced components and libraries for seamless user experiences.
- Integrated WebRTC technology with iOS components to enable real-time communication and enhance app functionality.
- Integrated advanced algorithms from the Data Science team to achieve superior noise cancellation and echo-free voice output, enhancing audio quality.

- Integrated **WebRTC** technology with iOS components to enable real-time communication and enhance app functionality.
- Integrated advanced algorithms from the Data Science team to achieve superior **noise cancellation** and **echo-free voice output**, enhancing audio quality.
- Monitored app analytics and QA feedback to identify areas for improvement, driving iterative updates for enhanced user experience.
- Improved the app review times by 30% through implementing efficient testing and deployment methods using **Continuous Integration/Delivery tools**.
- Managed app builds and updates, including **IPA uploads** to the Apple Developer Account and other public app distribution platforms.

Mobile Application:

speeqr: secure audio/video conferencing solution using webrtc.
link: testflight

IOS DEVELOPER — July 2021 - May 2022

Wanological Solutions: Expertise in creating dynamic UIs by **using storyboards**, integrating advanced APIs, **real-time data synchronization**, secure payment processing, and **performance optimization** to deliver market-specific applications. Successfully published multiple app versions on App Store, showcasing end-to-end development.

Mobile Applications:

tripscon: app gives unique travel marketplace that gives a one-stop solution to all travel needs.
link: appstore

akoya: feature-rich rider tracking system and an innovative middle eastern water delivery app.
link: appstore

switchfit: app that allows customers to book personal trainers or gyms in their surrounding area.
link: appstore

videomash: ultimate video editing application that enables users to effortlessly craft stunning videos and streaming app.
link: appstore

ASSOCIATE IOS DEVELOPER — Feb 2019 - June 2021

Novatore Solutions: My expertise includes developing **online marketplaces** with seamless functionality, building **health-focused apps** utilizing **iOS sensors** and real-time notifications, and designing platforms for ticketing, promotions, and secure online payments.

Mobile Applications:

addad cars: an online car marketplace app enabling seamless buying and selling of vehicles, featuring ad posting, car listings, and a favorites feature for enhanced user convenience.
link: appstore

neckup by master moltyortho: A posture detection tool using iOS sensors to monitor users and send real-time alerts, promoting healthier habits and improving spinal health.
link: appstore

CINESTAR Cinema: developed the Cinestar Movie Tickets app, a comprehensive platform for registration, promotional offers, upcoming movie listings, ticket booking, and secure online payment processing for a leading cinema chain.
link: appstore

Education

Bachelor of Science in Computer Science — **2014-2019**
Comsats University Islamabad

Technical Skills

Languages
Swift: Expert-level proficiency with extensive hands-on experience in iOS development.
Objective-C: Skilled in customising and maintaining legacy codebases.
SwiftUI: Expert in developing modern iOS interfaces with strong focus on clean architecture and reusable components.
Architecture & Design Patterns
MVVM, MVC, VIPER, SOLID Principles, Dependency Injection, Coordinator Pattern
Networking & Data
RESTful APIs, URLSession, JSON Parsing, WebSockets, Socket.IO, WebRTC, Real-time Data Synchronization
Security & Compliance
KYC/AML Workflows, NADRA Integration, Nafath Integration, Kafka Integration, PCI-DSS Compliance, State Bank SOPs, Secure Authentication, Biometric Authentication, Keychain Storage, Encryption Fundamentals
DevOps & Tools
Xcode, Git, GitHub, GitLab, CI/CD Pipelines, Swift Package Manager (SPM), Fastlane, TestFlight, Apple Developer Console, Postman, Jira, Figma, Claude
Messaging & Streaming
Kafka, WebSockets, Socket.IO, Push Notifications, APNs, Firebase Cloud Messaging (FCM)
Concurrency & Performance
Swift Concurrency (Async/Await), Grand Central Dispatch (GCD), Multithreading, Memory Management, Performance Optimization.
App Deployment & Distribution
App Store Deployment, App Store Connect, TestFlight Distribution, Provisioning Profiles, Certificates Management
Leadership
Technical Mentoring, Code Reviews, Architecture Design, Cross-functional Collaboration
Soft Skills
Team Collaboration & Management, Adaptability, Leadership, Time Management, Problem-Solving.

Certification

iOS App Development with Swift (University of Toronto) **coursera (2021)**

- Gained strong proficiency in Swift programming, UIKit, and iOS application lifecycle management.
- Built and structured iOS applications following best practices for performance, memory management, and user experience.
- Applied MVC/MVVM principles to create maintainable and scalable iOS codebases.

Google Project Management Certificate (PMP) -Continue **coursera (2026)**

- Acquired hands-on knowledge of Agile, Scrum, and Waterfall methodologies for software project delivery.
- Developed skills in stakeholder communication, risk management, and sprint planning.
- Applied project management tools and techniques to plan, track, and deliver projects on time and within scope.

Awards & Recognition

Engineering Excellence Award — 2023
Recognized for outstanding contributions to technical innovation and solution delivery at Speeqr.
Star Employee Award — 2024
Awarded for exceptional performance, ownership, and impact on project success.
